IWTM smart-degasser and smart filters

We, Hjellnes Consult AS, have used the IWTM smart-degasser on one of Norway's Largest buildings (Carlsberg Brewery Gjelleråsen) when the system was refilled following a breakdown.

Our experience is that the system was de-aired in a short time and that the degasser does work to our satisfaction.

At the same time IWTM Smart filters were installed and they proved to be very efficient and collecting a lot of sludge and magnetite in the system, to avoid problems with pumps and actuators.

Med vennlig hilsen
for Hjellnes Consult as

Arild Kristiseter
FDV Manager
